

# Superior Life Safety for Senior Living Facilities

As the population ages, so does your need to provide a safe and healthy environment for your residents. From Senior Centers, Assisted Living Facilities, Memory Care Facilities to Nursing Homes, Silent Knight fire alarm systems can give you confidence in protecting your residents and minimizing nuisance alarms. Eliminate your concerns in meeting insurance requirements.

## IFP-2000VIP

- Integrated voice evacuation in the fire alarm control panel simplifies the installation and operation of the system
- Easily interfaces with nurse call systems
- One button disconnect on notification circuit is preferred by first responders

## IDP-Photo Detector and Sounder Base

- Individual rooms can have sound notification locally or system wide, giving you the flexibility to make the system most effective and non-interruptive
- Saves costs because system choices are done through programming vs additional hardware

IFP-2000VIP

- *Cost effective systems for retrofit or new construction*
- *Safe solutions for individual rooms offer flexibility and confidence*
- *Lower maintenance costs with highly reliable systems*
- *Minimized nuisance alarms with utmost detection accuracy*

### CO Detector

- Sense dangerous carbon monoxide in every room and get notification at the central system control, so help can be dispatched faster

### Retrofits

Silent Knight systems can work with existing wiring from an old system, saving you the cost of rewiring your building, and reducing disruptions to your residents.

### IFP-1000VIP

- Fire alarm and voice evacuation are integrated into one system, simplifying the installation and operation of the system
- Easily interfaces with nurse call systems
- Highly reliable control panel reduces false alarms

### Silent Knight Fire Alarm Systems

Utilized in senior living facilities across the country, Silent Knight fire alarm systems provide the responsiveness and reliability needed for this industry. Multiple models to choose from make it easy to meet specific facility needs and are expandable to grow with your business. This is one building system that you don't need to worry about.

### SpectrAlert Advance Chimes, Speakers and Strobes

- Selectable-output chimes and chime/strobes are private mode notification appliances used to alerted trained personnel to investigate possible emergency situations and take appropriate action
- Nurse workstations and security guard stations are ideal locations for chime products
- SpectrAlert Advance speakers and speaker strobes provide a high fidelity and high volume sound output which makes it easier to get your emergency voice message across and understood by the residents
- Easy installation reduces labor costs
